

KAKO NAPRAVITI LABIRINT

1. Dođite na stranicu <http://www.mazegenerator.net/>
2. Označite parametre koje želite i kliknite na „Generate”

Maze Generator

Create a random maze by clicking "Generate". If you would like to print it, you will get best results by downloading and printing the PDF file. (The PDF file will contain the solution on the second page.)

Style:	<input type="text" value="Orthogonal (Square cells)"/>	Advanced settings
Width:	<input type="text" value="20"/> (2 to 200 cells)	E: <input type="text" value="50"/> (0 to 100)
Height:	<input type="text" value="20"/> (2 to 200 cells)	R: <input type="text" value="100"/> (0 to 100)
About Help Examples		<input type="button" value="Generate"/>

3. Kad vam se pokaže labirint, preuzmite ga na svoje računalo u pdf formatu

(The PDF file will contain the solution on the second page.)

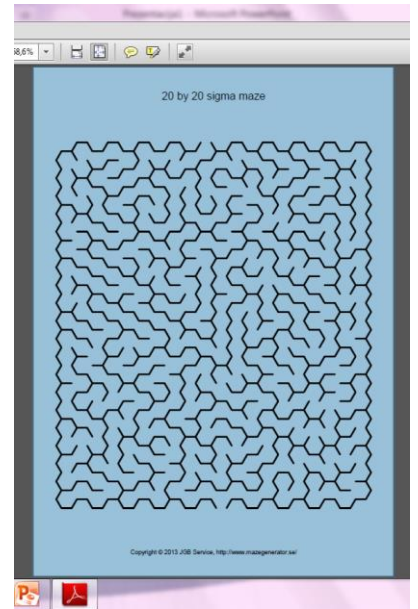

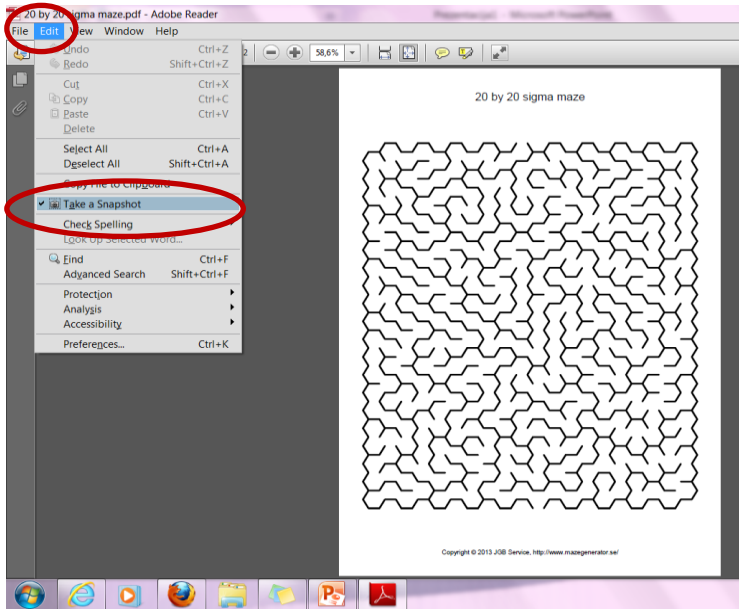

Style:	<input type="text" value="Sigma (Hexagonal cells)"/>	Advanced settings
Width:	<input type="text" value="20"/> (2 to 200 cells)	E: <input type="text" value="50"/> (0 to 100)
Height:	<input type="text" value="20"/> (2 to 200 cells)	R: <input type="text" value="100"/> (0 to 100)
About Help Examples		<input type="button" value="Generate new"/>

20 by 20 sigma maze

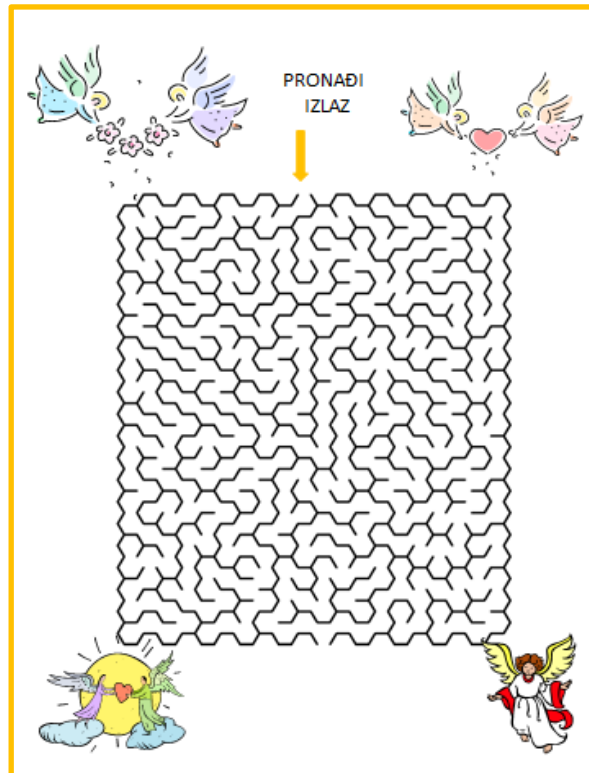

PDF (A4 size)

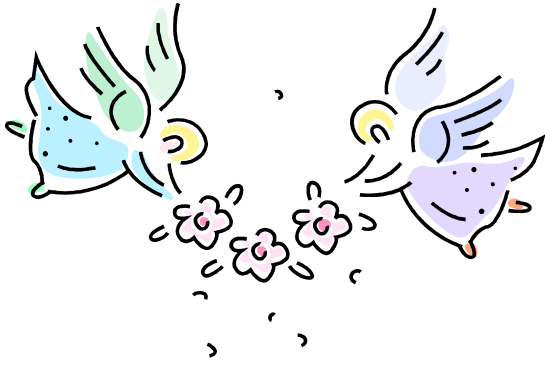

4. Ako labirint želite dodatno obogatiti, otvorite pdf (mora biti vidljiva cijela stranica), kliknite na „Take a Snapshot”, pa na labirint, a onda ga kopirajte u npr. Power Point. Ondje obrežite što vam je višak, dodajte slike ili crteže, tekst itd..

5. Gotovi labirint
